INVESTOR PITCH · CAIRO, EGYPT · 2026

# No More *Asking* Around for Technicians.

A technician marketplace built on referrals, verification, and real customer reputation.

REFERRAL-LED · VERIFIED · REPUTATION-BUILT

THE PROBLEM

# Finding A Reliable Technician In Egypt is broken

Finding a technician still depends heavily on word-of-mouth, informal communication, and luck.

## MULTIPLE

**CONVERSATIONS TO FIND ONE**

Friends, relatives, and neighbors — until someone knows a technician.

## NO

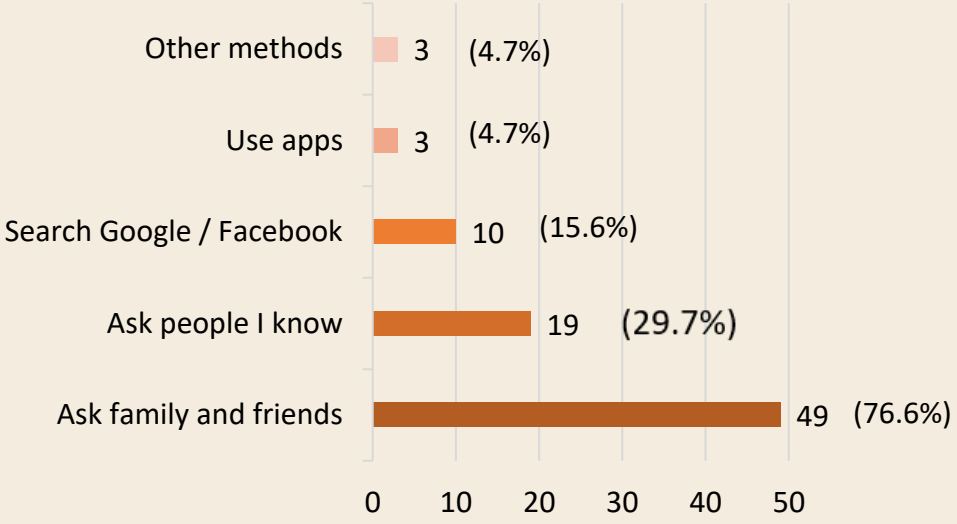

**SHARED TRUST RECORD**

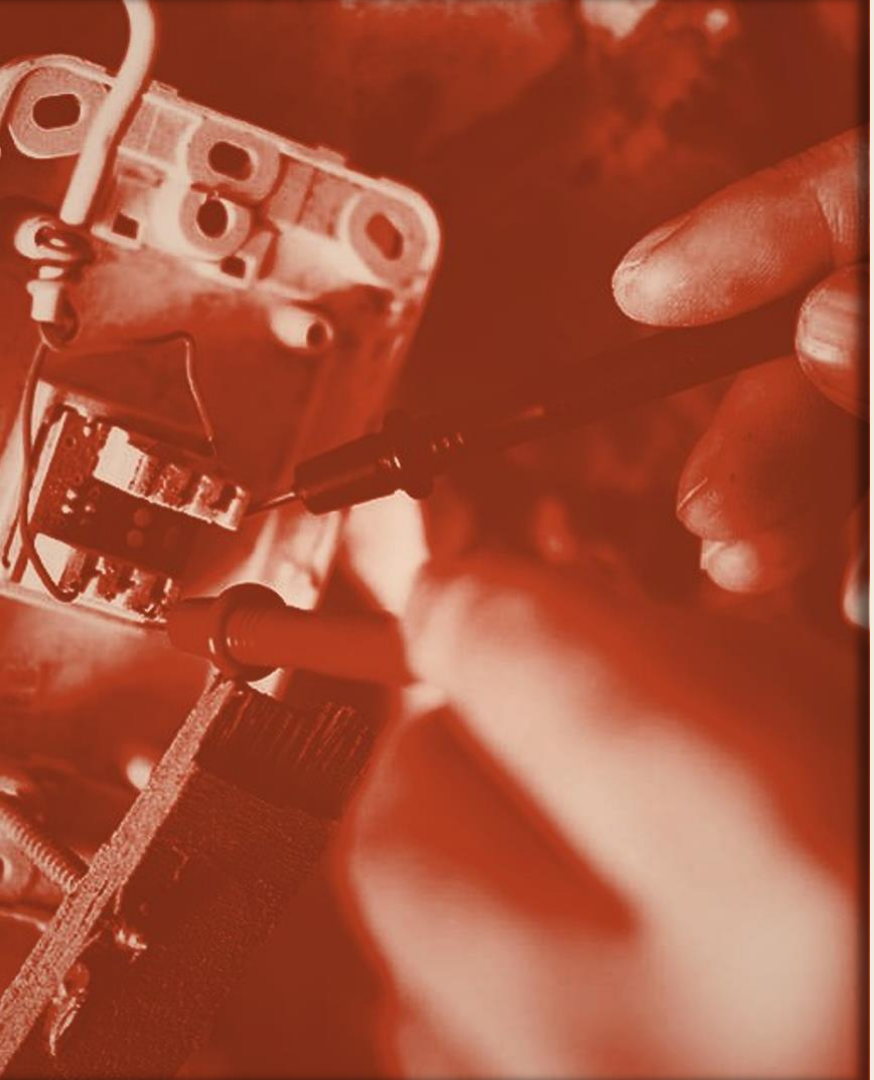

The recommendation lives inside one person's network — not a shared, searchable record.

## ONE

**AVERAGE HIDES DETAIL**

Speed, quality, and behavior can tell very different stories.

THE SOLUTION

# Provn Turns Word-Of-Mouth Into a Verified Network

Technicians are referred by people who know them, verified before they go live, then build reputation through real customer interactions.

REFERRED • VERIFIED • **RATED ON 3 AXES**

HOW IT WORKS

# Trust First, Search Second

Trust is built in layers — before and after a technician goes live.

## 01 Refer

A trusted person recommends a technician they already know.

NO REFERRAL · NO PROFILE

## 02 Verify

Provn confirms identity, trade, and the technician's consent.

IDENTITY · TRADE · CONSENT

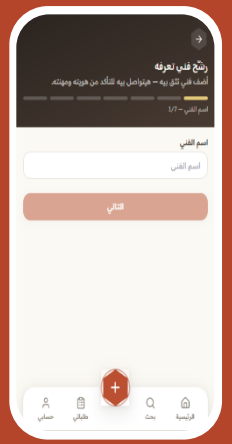

## 03 Rate

Real customers rate on Speed, Quality, and Behavior.

SPEED · QUALITY · BEHAVIOR

✦ **The Hunter Loop:** Referrers earn points when their referral leads to a verified technician and a completed service.

WHY THREE AXES

# One Star Isn’t Enough

One average score can hide very different customer experiences.

S

### SPEED

Did they show up when they said?

Response, punctuality, turnaround.

Q

### QUALITY

Did the work actually fix it?

Durability, cleanliness, recurrence.

B

### BEHAVIOR

Were they respectful in your home?

Courtesy, communication, care for the space.

Why Provn Wins

# Trust Starts Before The Search

Anyone can build a directory. What they cannot copy is a network of vouched-for relationships — rebuilt one customer at a time.

**Referral-first network**

Technicians enter through people who already know

**Hunters grow the network**

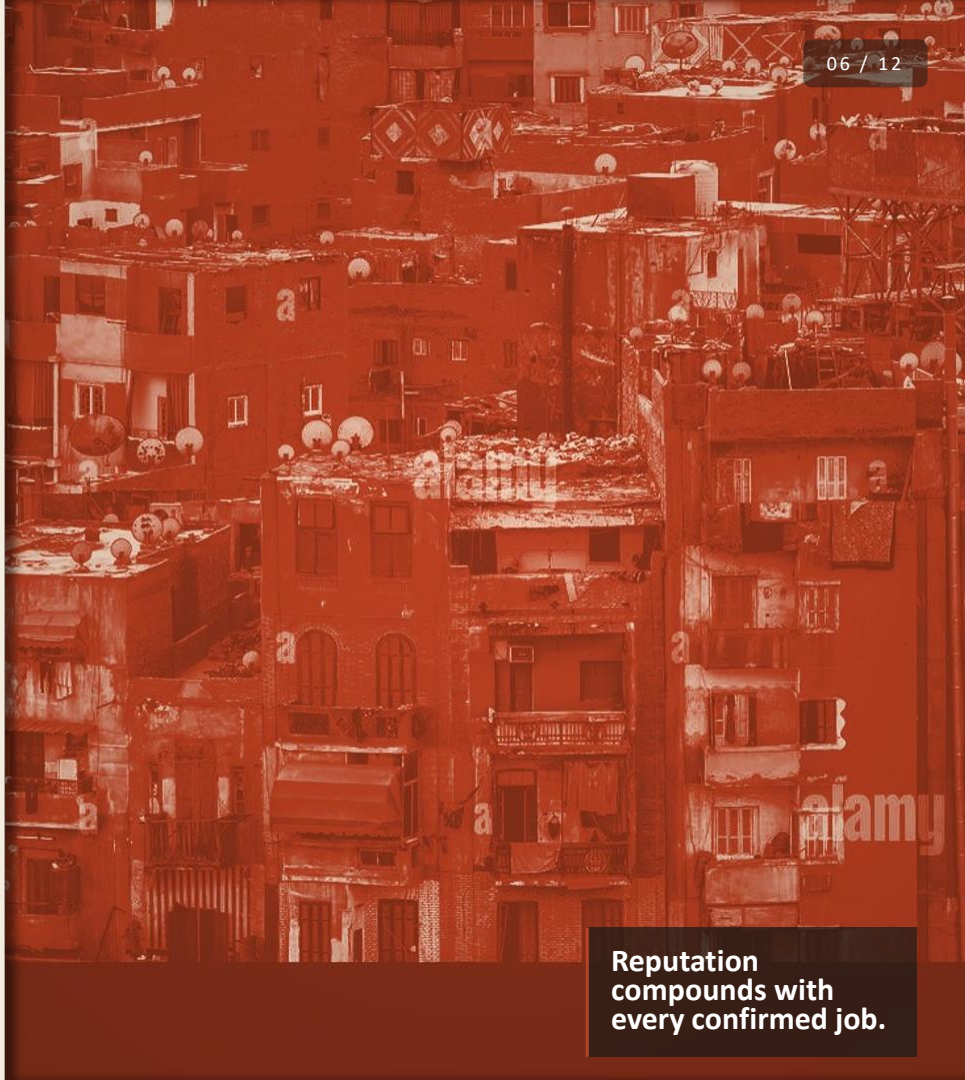

People are incentivized to bring trusted technicians into Provn.

**Reputation that compounds**

Every real service interaction strengthens a technician's reputation.

**Local trust density**

As the network grows locally, trusted supply becomes easier to find.

**Reputation compounds with every confirmed job.**

MARKET OPPORTUNITY

# A Market Hiding In Plain Sight

Egypt’s home-services market is still heavily driven by word-of-mouth and informal communication. Provn is built to formalize that trust layer at scale.

**118M+**

**POPULATION · 2025**

Egypt is the largest Arab country by population.

**43%**

**URBAN POPULATION · 2023**

A large urban customer base.

**$1.88B**

**HOME SERVICES MARKET · 2025**

Deep Market Insights estimate

**FRAGMENTED**

**MARKET STRUCTURE**

Trust is still fragmented across personal networks and informal channels.

GO-TO-MARKET

# Cairo First, Density Before Breadth

Provn wins one neighborhood at a time. Supply density creates demand reliability — then we move cities.

**DENSITY → RELIABILITY → REPLICATION**

01

PHASE 01

## 3 Cairo Districts

Maadi, Helwan, Nasr City. Build verified supply before opening demand.

**FOCUS: DENSITY**

02

PHASE 02

## Greater Cairo

Replicate the playbook across the metro and open B2B with property managers.

**FOCUS: B2B ANCHOR**

03

PHASE 03

## Expansion Cities

Take the proven playbook to Alexandria and the next priority city.

**FOCUS: REPLICABLE**

BUSINESS MODEL

# Three Streams, One Engine

Three revenue streams. advertising first; emergency service follows; B2B comes later as density grows.

PRIMARY

## Advertising

Clearly labeled placements for complementary tool and supply businesses

SCALE-DEPENDENT

GROWTH

## Premium Emergency Tier

Premium urgent jobs from the contracted Elite technician pool, with defined availability windows.

TRANSACTIONAL · PREMIUM

LATER

## B2B Elite Contracts

Vetted technicians contracted to property managers and FM firms. Recurring monthly revenue per contract.

RECURRING · CONTRACTED

THE NEXT STEP

# Turn The Prototype Into Proof

Prove the Cairo loop before expanding it.

THE OUTCOME

**Trusted supply → reliable demand → repeatable Cairo playbook**

Then repeat the playbook.

TEAM

# Five Owners, One Mission.

Each pillar has a dedicated owner who can answer any question in their domain.

## BELAL TAMER

**FINANCIAL MODEL & STRATEGY**

BMC, revenue model, and unit economics.

## MAZEN IBRAHIM

**FOUNDER &TEAM LEADER**

Product flows, verification, wallet, and technical logic.

## MUHRAIEL EMAD

**VISUAL IDENTITY & DESIGN**

Brand, deck, and product design.

## HABIBA ALI

**CONTENT & MARKETING**

Messaging, website copy, and pitch narrative.

## ABDELRAHMAN MAMDOUH

**RESEARCH & Q&A PREP**

Competitor research, Q&A, and assumption testing.

# No More *Asking* Around for Technicians.

A technician marketplace built from referrals, verification, and real customer reputation.

**Let's build Egypt's trusted technician network.**
