Assignment 2

1. Idea & Solution

Our app provides instant voice translation using AI technology to break language barriers for travelers, students, and professionals. It offers real-time conversation translation, offline mode for areas without internet, and a learning section to help users improve their language skills through past conversations.

2. Applied Questions

Who is the target audience?

The app is designed for tourists, travelers, students, and professionals who regularly communicate with people speaking different languages.

When and where will they use it?

It will be used anytime and anywhere someone needs to talk with another person in a language they do not understand.

What makes this app unique?

It offers AI-powered real-time voice translation without the need for special hardware, along with offline functionality and language learning enhancements.

Are there any limitations?

It requires an initial setup, and some devices may have limited compatibility.

How will users interact with it?

Users open the app and choose a mode:

- Conversation Mode for face-to-face real-time translation, or Meeting Mode for multi-user sessions. They can also use lecture Mode and access the Learn section to study and review past conversations for practice.

What are its main features?

- **Conversation** – Real-time face-to-face speech translation with audio.
- **Meeting Mode** – Multi-user sessions with instant synchronized translations.
- **Auto Language Detection** – Instantly identifies the spoken languages.
- **Offline Mode** – Works without internet using downloaded language packs.
- **Subtitles** – Shows translations as captions for easier understanding.
- **Friend Connectivity** – Add friends and start quick translation sessions.
- **AI Personalization** – Improves accuracy based on the user's speech style.
- **review Section** – Helps users review past conversations and improve their language skills.

3. Buyer Persona

John Smith

Age: 27

Occupation: Tourist

Goals: Travel to Egypt and communicate easily with people who speak a different language

Challenges: Faces difficulty
- understanding locals
- Struggles with communication
- Experiences a language barrier
- Frustrated by literal translations

Solution: Use the TalkMate app to enable clear, accurate, and effortless communication with locals.

Interests: Traveling, experiencing new cultures, meeting new people.

Buying Behavior: Likely to invest in practical apps and tools that make travel easier and improve communication abroad.

---

4. Value Proposition

We help international travelers and students overcome language barriers and communicate confidently through our

app’s instant, AI-powered voice translation and language learning features.

5. Proposition Statement

For international travelers and students who face language challenges, our app delivers fast, accurate translation without the need for special hardware. Unlike other translators, it works offline and includes tools to help users improve their language skills over time.
