Assignment 1

Problem Statement

Language barriers often create significant challenges for tourists, and travelers, making it difficult for them to effectively communicate and connect with people who do not speak their native language.

Who is affected by the language barrier?

- Tourists
- Immigrants in a new country
- Students studying abroad and still learning the language

When and where does it occur most often?

- I met someone speaking Spanish, but I couldn't understand them.
- I went into a grocery store in Japan, but the shopkeeper didn't understand English.
- I saw a Japanese traveler in Egypt struggling to communicate at a café.
- I had trouble completing normal everyday tasks due to a language barrier.
- I faced communication issues during an online meeting.

What challenges or difficulties does it cause?

people who travel to another country and don't speak the local language face difficulties communicating. When you meet someone who speaks a different language, it becomes challenging to interact effectively. This issue is important because communication is essential, and many people try to find alternative ways to overcome this barrier.

Are there any current solutions people use to overcome it?

Yes, this problem has led many people to create translation apps and find alternative ways to communicate, such as drawing pictures or speaking slowly and clearly to improve understanding.

If yes, why are these solutions not effective enough?

Most of these methods slow down the conversation. For example, drawing takes a lot of time to explain what I want to say. As for translation apps, most work by typing text and translating it, while some can translate voice to voice. However, they are often slow because they don't provide instant translation — there's usually a delay while the program processes it, and in many cases, you have to press a button to record each time someone wants to speak. This prevents smooth, real-time communication.

How common is this problem worldwide?

This problem is widespread across the world.

Brainstorm Using SCAMPER

Letter	Meaning	Idea or Example
S	Substitute	• Replace the press-to-talk button with one that remains active continuously. • Replace manual language selection with automatic language detection.
C	Combine	• Combine AI with translation. • Combine the meeting mode with meeting platforms like Zoom and others.
A	Adapt	• Adapt the program to work without internet access for places where it is difficult to connect online.
M	Modify	• Modify the meeting so that each participant has a turn to speak, and when one person finishes, the next continues.
P	Put to another use	• Use the program for language learning by reviewing past conversations and creating challenges. • Use the meeting mode for study sessions.
E	Eliminate	• Remove the subtitle mode. • Eliminate the need to manually update the app by enabling automatic updates in the background.
R	Rearrange	• Add an onboarding process before the registration page. • Add a guest login so users can try the program before registering.

Market Research

1. Problem Overview

- Language barriers cause communication difficulties for travelers, immigrants, and students abroad.

2. Key Competitors

Product/App Name	Features	Weaknesses
google translate	Text, voice translation	not including real time translation
timekettle	real time translation buds	battery, expensive , should work on specific hardware
Microsoft Translator	Text, voice, and real-time translation	Limited offline functionality compared to competitors

3. How satisfied are you with these methods?

- 1 – Not satisfied at all
- 2 – Slightly satisfied
- 3 – Neutral
- 4 – Satisfied
- 5 – Very satisfied

4. Would you prefer instant voice translation instead of text translation?

- Yes
- No

5. What is the biggest difficulty you face when communicating in another language?

Segmentation and Targeting

1.Segmentation

Factor	Details
Demographic	• Age: 18–40 years old • Gender: All genders • Education: short-term course students, and newly arrived international university students • Income: All income levels
Geographic	Country/Region: Regions with high tourism, high numbers of international students, or frequent international business travel
Behavioral	Usage Rate: They'll use it weekly to review past conversations and learn the language. Benefits Sought: Fast, understands dialects, works offline.
Psychographic	• Lifestyle: Travels frequently, studies in different countries, or visits new places. • Interests: People who enjoy travel and cross-cultural conversations. • Values: Loves cultural exchange and clear communication.

2.Targeting

Is the segment large enough to meet your goals?

Yes, large global audience with frequent need for translation.

Is the segment likely to grow over time?

Yes, the number of tourists and students worldwide is continuously increasing.

Can you effectively reach and serve this segment?

Yes, reachable online and via printed ads in tourist areas to promote app use.

Does the segment align with your brand's values and strengths?

Yes — aligns with our focus on communication and cultural connection.
